Add a script as a shortcut

1. **Install the script in Harmony**

2. **Open the *.js file of the script with any text editor and copy this piece of code**

```
/* Simon Thery - 2022 - ST_ResetEnveloppe 1.0
select just one point of a deformer to reset the rentier shape

------CODE FOR SHORTCUTS.XML----------

        <shortcut checkable="false" id="ResetEnveloppe"
itemParameter="ResetEnveloppe in ST_ResetEnveloppe.js"
responder="scriptResponder"
slot="onActionExecuteScript(QString)" text="ResetEnveloppe"
value=""/>

----------------------------------------
*/

var selectedNode = selection.selectedNode(0);
var parent = node.parentNode(selectedNode);
var currentNode;

function ResetEnveloppe() {
```

3. **Edit the shortcut Shortcut_template.xml file and paste the code at the very end between the lines.**

```
    text="Shift and Trace Tool"
    value="" />
 </category>

//NEW SCRIPTS --------------------------------------------
<category condition="not scan and not paint and hasTagging"
id="SCRIPTS" text="Scripts" > // Empty slot for the scripts
// INSERT THE NEW SCRIPTS BETWEEN THE TWO LINES BELOW
//--------------------------------------------------------

//--------------------------------------------------------
 </category>

</shortcuts>
```

100 % ⊖

You should have that :

```
id="SCRIPTS" text="Scripts" >
// INSERT THE NEW SCRIPTS BETWEEN THE TWO LINES BELOW
//-----------------------------------------------------
       <shortcut checkable="false" id="ResetEnveloppe"
itemParameter="ResetEnveloppe in ST_ResetEnveloppe.js"
responder="scriptResponder"
slot="onActionExecuteScript(QString)" text="ResetEnveloppe"
value=""/>

//-----------------------------------------------------
 </category>
```

4. **Save the file and rename it shortcut.xml**

5. **Copy this file and paste it here to replace the old shortcut.xml file**
    (⚠ In windows you need to be logged as an administrator)

6. **Open Harmony and go to Edit → Shortcuts** and assign a shortcut to the script.
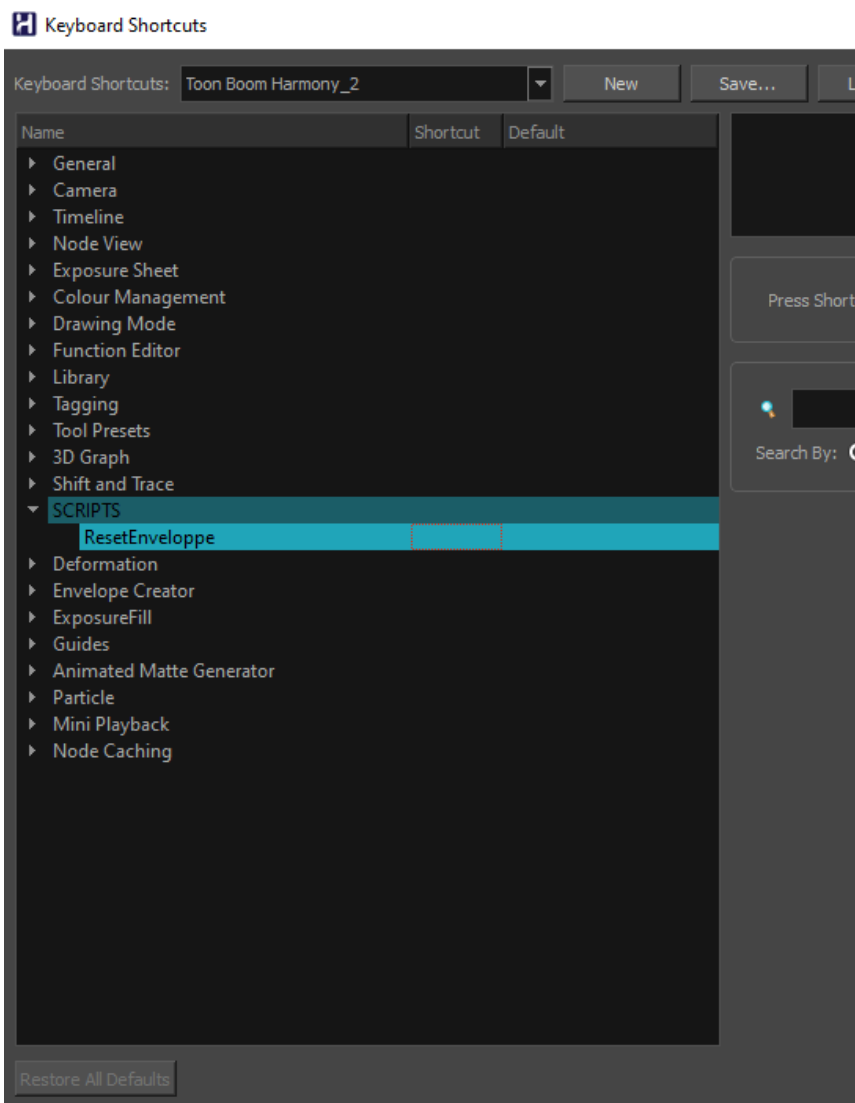

7. **If you want to had later another command edit directly the shortcut.xml file in the Harmony folder**

8. **Copy the code from the script (see the step 2)**

9. **paste it just under the previous one and save the file**

```
//NEW SCRIPTS --------------------------------------------
<category condition="not scan and not paint and hasTagging"
id="SCRIPTS" text="Scripts" >
// INSERT THE NEW SCRIPTS BETWEEN THE TWO LINES BELOW
//--------------------------------------------------------
       <shortcut checkable="false" id="ResetEnveloppe"
itemParameter="ResetEnveloppe in ST_ResetEnveloppe.js"
responder="scriptResponder"
slot="onActionExecuteScript(QString)" text="ResetEnveloppe"
value=""/>

       <shortcut checkable="false" id="ToggleFrameMarker"
itemParameter="ToggleFrameMarker in ST_ToggleFrameMarker.js"
responder="scriptResponder"
slot="onActionExecuteScript(QString)" text="ToggleFrameMarker"
value=""/>
//--------------------------------------------------------
 </category>

</shortcuts>
```
